Exercise 2e - Arrays

Beskrivning

You can declare arrays that contains an array of value.

int foo[2] = {1,2};

The arrays in C++ are 0-indexed. So if you want the first element you shall use:

my_value = foo[0];

Exercise 2e

- Create an array of integer with 3 elements.
- The array shall be declared directly with the values (1,5 and 8)
- Print out the second element in the array to the screen
